

About Us:

ARC Services (ARC) is a specialty welding, machining and heat treat services provider for the process and power industries. ARC provides safe, quality, and affordable services to customers for short/long term piping and boiler component modifications and installations. With over 200 years of combined experience in the welding and machining field, ARC Services provides only the most skilled craftsmen and management teams to our projects.

Vision

For ARC Services to be recognized as the most dependable and sought after welding and machining services provider.

Values

Safety, quality and timeliness are our top priorities, allowing our customers to eliminate their risk.

Mission

Our mission is to provide our customers with superior welding, machining and heat treating services that exceed our customers expectations while maintaining the safety of personnel and plant equipment, at competitive prices, and in a timely manner.

Why ARC Services?

- Our employees are cross-trained, adaptable, and professional
- We treat our employees and coworkers with dignity and respect. On a personal level we create a team, not just a workforce.
- We promote excellence and integrity by recognizing and honoring true commitment to providing our customers with superior service.

Welding Services

- Manual
- Orbital / Machine
- Exotic Materials
- Closure Welds
- Boilers
- Pressure Vessels
- Inspection Services
- Testing Facilities
- Welding Procedures

Field Machining

- Beveling
- Pipe Cutting
- Milling & Drilling
- Flange Facing
- Valve ID Repair
- Milling
- Custom Design
- Mechanical or MDM Stud Removal

Heat Treating

Pre-heat and Post Weld Heat Treat (PWHT) services are a great compliment to our welding and machining services. By offering both types of services, we are able to meet a broader range of our customer's needs. Our technicians have experience in both resistance and induction heating.

Custom Product Design and Fabrication

Using software and manufacturing techniques, ARC Services create tooling that meets your project needs including:

- Modification of existing tools on the market
- Complete design and fabrication of one of a kind tools

Staff Augmentation

ARC Services understands that manpower is not always readily available when projects are in full swing. When multiple projects are working within the same geographical area, or other large scale projects are competing for wages and hours, ARC can augment staffing needs large and small while working with the local and international unions at the same time.
